

<b>Name of the course</b>	<b>Recent issues in the field of corrosion</b>
Number of instruction hours	20
Outline of course/module content	Microbiologically influenced corrosion, Corrosion in the nuclear industry, Corrosion and protection of cultural heritage, Ecologically acceptable corrosion protection - "green" corrosion inhibitors, Multifunctional coatings, Numerical modeling in corrosion, Application of scientific methods in analysis of corrosion failures and assessment of corrosion risks.
Description of instruction methods	Lectures, consultations and seminar papers.
Description of course/module requirements	Oral exam. Oral presentation of the seminar paper.
